- Lender is a tracking web app that enables its users keep solid records of people owing them money and people they owe money. With useful information like when the loan is due for payments and also if it has incurred any interest over time. Technologies used are ASP.NET, C#.
- Church Management system (***Fx-Kip***) with full functional backend. Technologies used are Vanilla PHP, Bootstrap 4, JavaScript.
- Digital Sales assistant (***Sunesis Mobile***) where the business owner key in customer orders, and the system handles the collation of data and cost analysis. Technologies used: Vanilla PHP, HTML5, Bootstrap 4, CSS3.

PERSONAL QUALITIES

- Strong work ethic.
- Ability to work with people from different backgrounds.
- Good communication skills.
- Good organizational skill.
- Ability to improve from response and feedback.
- A reliable team player.

WORK HISTORY

Code360 Academy

Full Stack Developer | *November 2019 – Present*

- Design of User Authorization and Identification in asp. Net core.
- Re-designed and dramatically simplified an overly-complex user interface while preserving all functionality.
- Design, develop, debug, test, ensure browser compatibility and implement website code using LocalDb server with Entity Framework and ASP.NET MVC, C#, Microsoft.NET Core.

- Integration of front-end element created by front-end developers with server-side logic.
- Implemented CRUD operations using ASP.NET MVC with Entity Framework, and C#

Web developer

John Pofi Foundation | July 2018 – June 2019

National Youth Service Corps

- Designed Campaign websites to foster a wider reach, using HTML5, CSS3, and Bootstrap.
- Designed the foundations website using vanilla PHP, HTML5, CSS3, and Bootstrap.

Tech Intern

Martins Probity

January 2018 – June 2018

IT Officer

St. Peter's (Ang) Church, Olodi

2013 – 2017

EDUCATION

B.Sc. Computer Science

Bachelor of Science, Second Class Honours (Upper Division)

University of Nigeria, Nsukka.

2017

- Successfully completed my research project on the design and implementation of a project performance prediction system, based on SIWES experience. Technologies used were Vanilla PHP, HTML5, CSS3, and Bootstrap.
- Organized tutorials in Physics and Mathematics for year one and two students at my final year as well as other numerous departmental tutorials. This gave me opportunity to always study to gain broad knowledge of those courses so as to deliver appropriately.

West African Senior School Certificate

Sacred Heart College, Apapa.

2012

- Participated in Cowbell Competition at Lagos State and was exposed to fast thinking to get results.

CERTIFICATIONS

Cloud Computing

Microsoft Azure Fundamentals | January 2020

- Exercised competency in basic cloud computing

Discharge Certificate of National Youth Service Corps, NYSC Plateau State.
June 2019

Google Online Basics **2014**

- Exercised competency in google analytic skills for online web surfing.
